

Exercise 6-- APA 6th and DOI Edit an In-text Citation; Edit an Output Style

The 6th edition of APA requires that the **DOI** be added to the cited reference. The Digital Object Identifier is a unique way to locate a citation in the digital environment and provides a persistent link to identify an online item. The DOI can be searched in the DOI System website at <http://www.doi.org>; paste the DOI into the *Resolve a DOI Name* search box, click **Submit** and the complete citation for the item is then displayed.

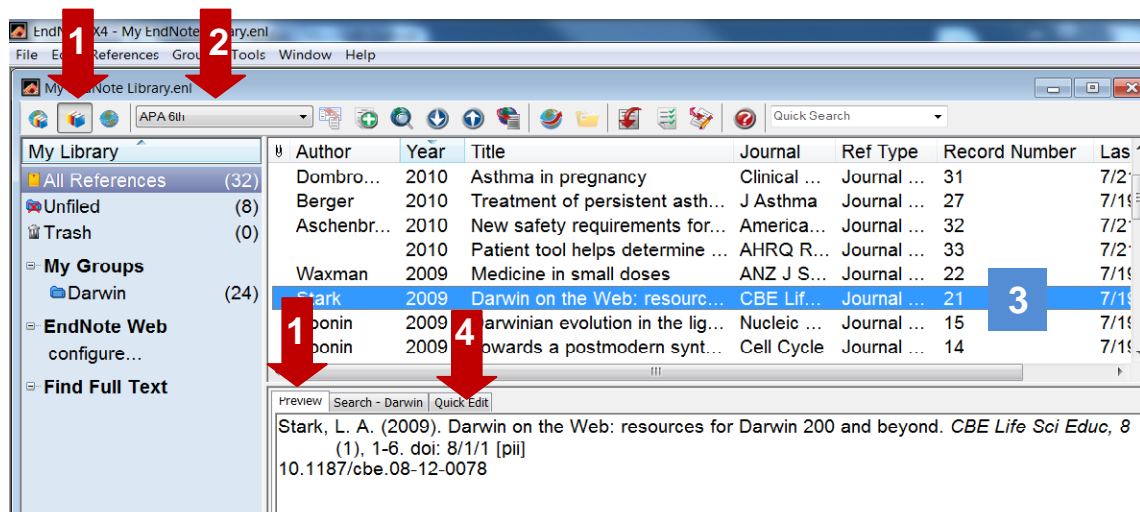

Using the DOI makes managing intellectual property in a networked environment much easier and more convenient.

Some things you need to know.

- PubMed has an **AID** (article identifier) field that populates the DOI field in EndNote
- The AID can contain both a **DOI** and a **PII** (publisher item identifier)
- For the purposes of APA 6th you need to remove the PII from the DOI field
- It is recommended that anytime you add PubMed citations to your EndNote Library you review the records and remove the PII from the DOI field. You can cut and paste the PII into another field or create a custom field to display the PII.

To review references in EndNote

1. Select **Local Library Mode** and the **Preview** tab at the bottom of the page
2. Use the **Styles** pull-down menu to select **APA 6th**
3. Highlight and scroll through the references looking for unwanted PIIs
4. Select **Quick Edit** and scroll to the DOI field; edit field by removing the PII and spacing or make other needed edits
5. Answer **Yes** to *Do you want to save the changes you made to the reference?*

The screenshot shows the EndNote interface with a list of references. The following table represents the data visible in the reference list:

Author	Year	Title	Journal	Ref Type	Record Number	Las
Dombro...	2010	Asthma in pregnancy	Clinical ...	Journal ...	31	7/2
Berger	2010	Treatment of persistent asth...	J Asthma	Journal ...	27	7/19
Aschenbr...	2010	New safety requirements for...	America...	Journal ...	32	7/2
	2010	Patient tool helps determine ...	AHRQ R...	Journal ...	33	7/2
Waxman	2009	Medicine in small doses	ANZ J S...	Journal ...	22	7/19
Stark	2009	Darwin on the Web: resourc...	CBE Lif...	Journal ...	21	7/19
ponin	2009	darwinian evolution in the lig...	Nucleic ...	Journal ...	15	7/19
ponin	2009	towards a postmodern synt...	Cell Cycle	Journal ...	14	7/19

The preview window shows the following citation:

Stark, L. A. (2009). Darwin on the Web: resources for Darwin 200 and beyond. *CBE Life Sci Educ*, 8(1), 1-6. doi: 8/1/1 [pii]
10.1187/cbe.08-12-0078

NOTE: You can copy the PII to the Notes field or another field of choice. You can also create a custom field in EndNote preferences: Go to **Edit > Preferences > Reference Types > Modify Reference Types > Modify Custom # field to PII**

Edit an In-Text Citation

In the Word document, right click on the inserted citation. Options include **exclude author**, **exclude year**, or **more**. Click on more to see additional options. (For example, prefix, suffix, pages.) The action selected only affects that in-text citation.

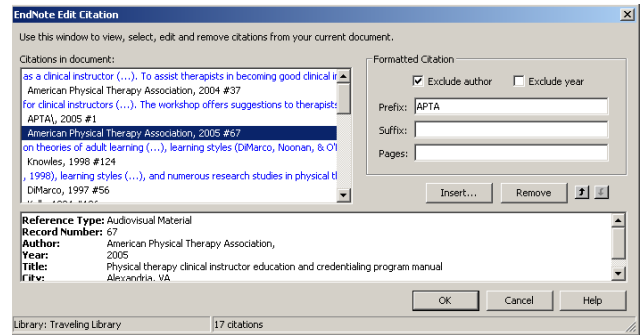

In-text Citations--Corporate Author Adjustment

Corporate name abbreviation after first occurrence:

For example: *American Physical Therapy Association*

In MSWord, click on the citation you want to edit,

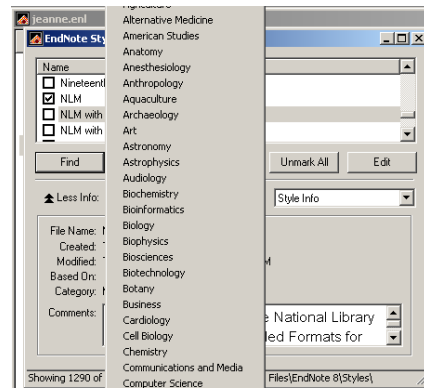

then go to **Tools > EndNote > Edit Citation**. Select the option to **Exclude Author**, then enter abbreviation (APTA) in the **Prefix** field. Then click **OK**. This will need to be done for each occurrence in the document.

Selecting Output Styles for Use

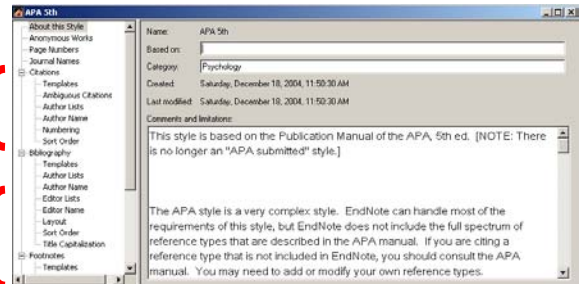

Path: **Edit > Output Styles > Open Style Manager**

Search for a style by broad subject area. Select by checking the box to the left of the style name.

Edit an Output Style

The specific output style you want to use may not be available from the list of 4000+ output styles. If that is the case, you can select a style that is similar and edit it. Path: **Edit > Output Styles > Edit <selected style>** From the style dialog box make appropriate changes. Changes can be made to the **Citations** (in-text information) and the **Bibliography**.
