TIME: 10:00-11:30 A.M.

WHERE: Eccles Library History of Medicine Room, upper level

RSVP: Contact Jeanne Le Ber at 801-585-6744 or
jeannele@lib.med.utah.edu

Overview--Information Literacy for the 21st Century Learner

Panelists will give an overview of information literacy theory and practice with special attention to AASL and ACRL standards and identification of core competencies. Panelists will stress the importance of teaching college-level skills in high school. They will address the disconnect between high schools and colleges in the teaching of information literacy skills and how active assessment can help. The panel will specifically discuss the IMLS grant project's assessment instrument--its attitudinal, multiple choice, and constructed response questions as well as its effectiveness in field testing in the classroom setting.

Overview--Confronting the Crisis in Library Education

Are today's library education programs doing an adequate job of training the next generation of librarians? Is there really a crisis in library education? Whether you are a library educator, a library administrator seeking qualified candidates, a recent library school graduate looking for that first job, or a current or future library school student, we invite you to share your unique perspective on this topic that is of vital interest to our profession.
