Patents

Prostheses and methods for promoting nerve regeneration and inhibiting the formation of neuromas. Patent No. 4,778,467, filed July 1986.

Microbiological systems for phosphate extraction and distribution to plant root systems. Patent No. 4,589,226, filed Aug. 1984.

System and method for the fertilization of forest, farm and other large plant communities. Patent No. 4,581,846, filed Oct. 1984.

Prostheses and methods for promoting nerve regeneration. Patent No. 4,662,884, filed April 1984.

Plant fertilization using a microbiological system for phosphorus extraction and distribution. Ser. No. 06.473,354, filed March 1983.
