

## [Changing your Poll Everywhere Username:](#)

When students are responding to activities you've created with Poll Everywhere, they will be connecting to your PollEv response page to do so (ie *pollev.com/your PE username*). You have the ability to change the username on your account as many times as you like to make the experience of connecting to the presentation easier or perhaps to match the content you are presenting.

- [Customize your username and the URL of your response page](#)

## [Identifying correct responses and assigning points:](#)

Poll Everywhere's multiple choice and clickable image activities allow the creator to identify both correctness and assign point values to the response options they are listing.

- [How to enable weighted grading on your account and assign point values to multiple choice and clickable image activities](#)
- How to identify a correct answer(s) on multiple choice and clickable image activities:

### Multiple Choice:

You can designate correct response(s) to a Multiple choice Activity. **Check the box** to the left of the correct response option(s). A correct response will be highlighted green, when you reveal correctness on the Activity chart. You can set as many correct responses as you wish.

The screenshot shows the configuration for a Multiple Choice activity. At the top, there is a navigation bar with icons for various activity types: Multiple choice, Word cloud, Q&A, Clickable image, Survey, Open-ended, Competition, and More. Below this, the activity title is set to "What is 2+2?". There are three response options listed:

Option	Points
4	4
5	5
3	3

The "4" option is marked as correct with a green checkmark and a green highlight. There is an "Add option" button at the bottom.

## Clickable image:

**Marking correct regions:** For a Clickable image activity, you must define a region for pin responses, and mark a region as correct (the checkmark on the option is pretty small, on the left side of the name of the region). You can only do this for answers received after the region is defined. Any clicks received before the region is defined will not be captured by the region.

The screenshot shows the 'Clickable image' activity creation screen. At the top, there is a navigation bar with icons for 'Multiple choice', 'Word cloud', 'Q&A', 'Clickable image', 'Survey', 'Open-ended', and 'Competition'. Below this, a text box contains the title 'Which one is the saddest face?'. The main area displays five circular emoji options labeled A through E, ranging from a very sad face to a happy face. A red circle highlights a small green checkmark next to option A, 'Saddest'. To the right of the image, a text box says 'Click anywhere on the image to track how many clicks that region receives.' At the bottom, there is a dropdown menu for 'Assign activity to a group', a blue button for 'Add another activity', and a blue button for 'Create'.

## Customizing your activities via the Visual Settings menu:

Every activity you create with Poll Everywhere with the exception of the Survey and Competition activity types will have a corresponding Visual Settings menu. It is from this menu that you can customize the look and feel of the activities you are creating with Poll Everywhere.

The screenshot shows the 'Visual Settings' menu for an activity. At the top, there are buttons for '+ Activity', 'Folder', and 'Upload'. Below this, the 'Activities' section is visible. A table lists the activities with columns for 'Order', 'Name', 'Last modified', and 'Count'. The first activity is 'Do not delete' with a count of 4 items, last modified on 03/31/22 at 05:14 PM. The second activity is 'Activity Example' with a count of 0 responses, last modified less than a minute ago. A green arrow points to the 'Activity Example' row with the word 'Click' next to it.

Order	Name	Last modified	Count
	Do not delete	05:14 PM on 03/31/22	4 items
1	Activity Example	less than a minute ago	0 responses
