Positive urine pregnancy test → Transvaginal ultrasound → No IUP → IUP → Immediate surgical treatment

Assess risk factors for ectopic pregnancy

Quantitative hCG
D & C

Uterine curettings floated in saline

Villi present

Await final histology

Villi Absent

• Repeat hCG in 12-24 hours
• Transvaginal ultrasound

Villi present

Villi absent

• Incomplete abortion
• Routine follow-up

hCG increasing mass > 3.5 cm

hCG increasing mass ≤3.5 cm

Ectopic pregnancy

Increasing hCG

Nonlaparoscopic methotrexate

Decreasing hCG

Follow-up hCG in 48 hours

Decreasing hCG

• Completed AB
• Ectopic spontaneous resolution

Laparoscopy
