**LIFT Forum Spring Schedule**

The Spencer S. Eccles Health Sciences Library sponsors a series of brown bag seminars related to library and information technologies. The Library and Information Technology Forum (LIFT) is generally held the second Wednesday of the month in the Health Sciences Education Building (HSEB), Room 2680 from 12:05 until 1:00 P.M. Sessions provide an opportunity for faculty, staff and students to learn about new computer technologies and electronic information sources. Visit our LIFT Forum website at [http://library.med.utah.edu/or/lift/lift.php](http://library.med.utah.edu/or/lift/lift.php).

The January 17, 2007 LIFT Forum features Tony Sams, from the J. Willard Marriott Library's Student Computing Labs, who will talk about Marratech, a Web conferencing solution. Marratech is a cross-platform audio/video conferencing solution that can share an interactive whiteboard, document, image, PDF file, or an application. Marratech is available to the University of Utah community. Program scheduled in HSEB 2948 at 12:05 P.M.

**Forum Schedule: 12:05 to 1:00 P.M.**
- **January 17**—Tony Sams—*Desktop Video Conferencing with Marratech* (HSEB 2948)
- **February 7**—Sharon Dennis—*RSS Feeds: The “New” Current Awareness Service* (HSEB 2680)
- **March 14**—Steve Hess—*Impact of IT on Higher Education* (HSEB 2680)
- **May 2**—TBA (HSEB 2680)

---

**Wayne J. Peay Elected to ACMI**

At the 2006 Annual Symposium of the American Medical Informatics Association, Wayne J. Peay, Director of the Spencer S. Eccles Health Sciences Library, was inducted into the American College of Medical Informatics (ACMI).

Election to the membership of the college of fellows from the United States and abroad recognizes significant and sustained contributions to the field of biomedical and health informatics. Among the projects that were considered in the election are:

- participation in the original IAIMS contract
- development of a statewide technology plan for the Utah System for Higher Education
- securing support for the deployment of integrated library systems in the colleges and university libraries in Utah
- promoting the use of advanced digital video services
- lead development of Pioneer: Utah's Online Library
- co-chaired the 2004 Symposium on Community Based Health Information Outreach at the National Library of Medicine
- securing the award of the contract for the MidContinental Region of the National Network of Libraries of Medicine for the University of Utah.

Wayne has been director of the Eccles Library since 1984. His responsibilities now include the administration of the Spencer F. and Cleone P. Eccles Health Sciences Education Building.
Growing the Next Generation

Sally Patrick, Utahealthnet Project Director
Spencer S. Eccles Health Sciences Library

The Spencer S. Eccles Health Sciences Library has a long tradition of supporting colleagues who have chosen to acquire a Master's degree in library science while working at the library. The student pays their own tuition but the library encourages projects that merge work and school and flexible scheduling is offered to accommodate classes. In this way we "grow the next generation" of professional librarians as well as benefit from the latest ideas our students are learning. There is no requirement that a newly minted M.L.S. stay at the library, but of course we always hope they do!

Most of our students are juggling full time employment as well as library school. In "the old days" when BYU had a master's program, our colleagues took time off from work and trekked to Provo for class; there were always class projects and lots of homework. Within the last decade, numerous programs around the country have offered online library education. Some offer all coursework online with heavy emphasis on interactive Web participation. Many more have a requirement of visiting the campus for some face-to-face classes and advising. Utah hosts a combination program from Emporia State University which integrates online work with weekend-intensives one weekend a month.

Currently, two of our colleagues are attending library school remotely. The following dialogue reflects why we are so proud of their choice and dedication to our profession.

Allyson Mower is an Adjunct Assistant Librarian working on digital projects such as the NOVEL (Neuro-Ophthalmology Virtual Education Library) and the Institutional Repository. In addition, she brings provocative new readings to our monthly journal club. Allyson is attending the University of Washington and is beginning her second semester.

Jennie Morris is an Adjunct Assistant Librarian and our Night and Weekend Supervisor in Public Services. In addition, Jennie assists with the goLocalUtah consumer health and human services project. Jennie is attending Syracuse University and is beginning her second semester.

What made you choose to get an advanced degree in Library Science?
Allyson: Well, a Liberal Arts degree is great, but a professional degree has to come in at some point too. Also, I wanted an educational component to go along with working at a library.

Jennie: I thought that the pursuit of a degree in Library Science would be a great opportunity to develop and expand my knowledge of libraries and library systems as well as establish my career as a librarian.

Tell us a bit about your university and the aspects of the program that made you choose this institution?
Allyson: I attend the Information School at the University of Washington. I chose the program for many reasons, but, I have to admit, being "forced" to visit Seattle on a regular basis drew me in. The school's focus on information theory, teaching and research methods appealed to me as well.

Jennie: I chose Syracuse University's School of Information Studies because it is "The Original Information School" and places emphasis on information and telecommunications management, information representation and retrieval, human-information interaction, and information and society. It would be difficult to pass up a school with this kind of reputation, especially when it's located in scenic New York.

What are the ideas and concepts that you have found most interesting so far?
Allyson: This is probably obvious for most, but I found it intriguing…the idea that people seek information in order to make sense of whatever situation they happen to be in. The idea addresses the fact that we will always experience gaps in knowledge and in order to bridge the gap, we seek information from a variety of sources: the Internet, a book, a database, a course, a friend, etc. It seems like a common sense idea, but I hadn't ever considered it before.

Jennie: In my coursework so far, I have found the digitization of library collections particularly interesting. It is strange to think that the traditional library may cease to exist as print collections evolve into online collections. It has therefore been interesting to read case studies and evaluate online library collections in an attempt to further understand the transition of libraries in the future. It's really exciting!

Has your experience and the knowledge of your Eccles Library colleagues been helpful in your studies?
Allyson: Immensely! The amount of knowledge and expertise in this place is astounding. There's always an expert around the corner and the camaraderie makes work very enjoyable.

Jennie: It has been a wonderful and invaluable experience to be able to work among the faculty at Eccles Library while obtaining my degree. I am constantly amazed at the quality of work being produced at Eccles Library and the level of expertise of the faculty members.

Mary Youngkin, Jeanne Le Ber, John Bramble, Valeri Craigle, and Alice Weber (interned), received their library science degrees while working at the Eccles Library.
Introducing . . . Amanda Bushnell
Public Services Assistant
Spencer S. Eccles Health Sciences Library

The “Introducing . . .” column is a regular feature that profiles an employee of the Spencer S. Eccles Health Sciences Library. It is a way of introducing our staff to you. This month features Amanda Bushnell.

Coming from a family of doctors and computer scientists, Amanda Bushnell broke tradition by following her passion for literature. She graduated from the University of Utah with a Bachelor of Arts in English in 2006.

Like the character Princeton in the Broadway musical *Avenue Q*, Amanda had to ask herself, as graduation approached, “What do you do with a B.A. in English?” The natural answer was to turn her love of books and reading into a career and become a librarian. To test the waters, so to speak, Amanda volunteers at the The City Library (downtown Salt Lake City) in the children's library. This has proven to be something she enjoys very much.

In August 2006, she joined the Public Services staff at the Spencer S. Eccles Health Sciences Library.

Amanda's next step on the way to becoming a librarian is applying to graduate school. A native of Salt Lake City, she hopes to head east to get her masters degree in Library Science. Ultimately, she would like to be an archivist specializing in rare book preservation, though she wouldn't mind working as a children's librarian.

In addition to her job at the Eccles Library, Amanda works as a secretary at the University of Utah Neuropsychiatric Institute. When not working, Amanda likes to travel, knit, shop, play the piano and hang out with family, friends and her cat, Roxanne.

Library Personnel Changes

Trang Tran has accepted the position of Financial Analyst beginning January 29th replacing David Beckstrom who left in September to return to the Park Building in Governmental Accounting. Trang comes to us from the Institute for Combustion and Energy Studies in the Chemical Engineering Department where she has been working since 2002. She comes with experience in financial management for research projects, payroll, purchasing and budgeting among other things. She has also worked at the College of Law and the UCard Office on campus. Trang is a graduate of the University of Utah in Accounting and also in Business Information Systems. We welcome Trang to our staff.

NANOS 2007 Comes to Snowbird

The North American Neuro-ophthalmology Society (NANOS) will be holding their annual meeting at Snowbird this year. The Spencer S. Eccles Health Sciences Library will be participating in the conference through a number of programs which have been accepted for the final program. The programs where Eccles Library faculty and staff will be participating include:

1) Mary Youngkin and Allyson Mower: Your Copyrights, Your Publications, and Your Intellectual Property: How Can You Make the Most of It?

Librarians from Eccles Library will discuss current scholarly publishing concerns primarily focusing on protecting copyrights, participating in open access publications, and preserving scholarly materials in digital repositories. This workshop features the ways and means for managing research and ensuring that it receives the widest possible distribution and has the greatest impact in the scholarly community.

2) Jeanne Le Ber, Mary Mc Farland, Allyson Mower, Liz Workman, and Nancy Lombardo: EndNote, PubMed and PowerPoint training

This 3-hour workshop will be divided into three parts, devoting one hour to each of these three valuable tools. These three software applications were selected based on responses from members in a recent survey. The Eccles Library will be collaborating with the NANOS Web Education Committee as a sponsor of this program. The library will provide as many as 20 laptops for members to use for hands on practice. Members will also be invited to bring their own laptops. Each of the three sessions will provide a lecture demonstration, followed by time to practice directly with the software. Exercises will be provided to give members some specific examples of meaningful uses of the tools.

The Neuro-ophthalmology Virtual Education Library (NOVEL) project is a model for development of digital collections through academic library and professional society partnerships using electronic publishing technologies, resulting in an open access repository of digital neuro-ophthalmology materials. The Eccles Library partnered with the North American Neuro-ophthalmology Society (NANOS) to produce the NOVEL project. The methods and results of this project will be presented through this poster.
Classes @ the Library

Tours and Orientations
To schedule call 801-581-5534 or email Mary McFarland at marym@lib.med.utah.edu

Access Basics
- **HSEB 3100D**
  - Monday, January 8, 2007 2:30 P.M.-4:00 P.M.
  - Monday, February 26, 2007 1:00 P.M.-2:30 P.M.

Access Advanced
- **HSEB 3100D**
  - Monday, January 22, 2007 1:00 P.M.-3:00 P.M.
  - Monday, March 26, 2007 1:00 P.M.-3:00 P.M.

Basic Design
By request for groups of four or more; contact Susan Roberts at 801-581-3031 or sroberts@lib.med.utah.edu

Bibliographic Management
**EndNote (version X)**
- **HSEB 3100D**
  - Friday, January 19, 2007 8:00 A.M.-10:00 A.M.
  - Wednesday, January 31, 2007 10:00 A.M.-12:00 P.M.
  - Monday, February 12, 2007 2:00 P.M.-4:00 P.M.
  - Thursday, March 15, 2007 1:00 P.M.-3:00 P.M.
  - Monday, April 16, 2007 2:00 P.M.-4:00 P.M.

**EndNote, Follow-up Session**
To be arranged; contact Jeanne Le Ber at 801-585-6744.

**Breeze Live**
By request; contact Susan Roberts at 801-581-3031 or sroberts@lib.med.utah.edu

**Contribute**
By request for groups of four or more; contact Susan Roberts at 801-581-3031 or sroberts@lib.med.utah.edu

**Dreamweaver, Part 1 and 2**
By request for groups of four or more; contact Susan Roberts at 801-581-3031 or sroberts@lib.med.utah.edu

**Excel Essentials, Part 1**
- **HSEB 3100D**
  - Monday, February 5, 2007 2:00 P.M.-3:00 P.M.
  - Tuesday, March 6, 2007 2:00 P.M.-3:00 P.M.

**Excel Essentials, Part 2**
- **HSEB 3100D**
  - Wednesday, February 7, 2007 2:00 P.M.-3:00 P.M.
  - Thursday, March 8, 2007 2:00 P.M.-3:00 P.M.

**Grant Writing and Research**
- **HSEB 3100 Suite**
  - Friday, February 16, 2007 9:30 A.M.-11:30 A.M.
  - Friday, March 30, 2007 9:30 A.M.-11:30 A.M.

**PowerPoint, Basic Presentations**
- **HSEB 3100B**
  - Friday, January 26, 2007 2:00 P.M.-4:00 P.M.
  - Monday, February 26, 2007 2:00 P.M.-4:00 P.M.

**PowerPoint, Advanced Techniques**
- **HSEB 3100B**
  - Friday, February 9, 2007 2:00 P.M.-4:00 P.M.
  - Monday, March 5, 2007 2:00 P.M.-4:00 P.M.

**PowerPoint, Animation Part 1 and 2**
By request for groups of four or more; contact Susan Roberts at 801-581-3031 or sroberts@lib.med.utah.edu

**PowerPoint, Posters**
- HSEB 3100B
  - Friday, February 23, 2007 2:00 P.M.-3:30 P.M.
  - Monday, March 12, 2007 2:00 P.M.-3:30 P.M.

**PubMed MEDLINE Basics & Beyond**
- HSEB 3100 Suite
  - Monday, January 8, 2007 10:00 A.M.-12:00 P.M.
  - Wednesday, January 17, 2007 2:00 P.M.-4:00 P.M.
  - Wednesday, February 7, 2007 2:00 P.M.-4:00 P.M.
  - Thursday, February 22, 2007 3:00 P.M.-5:00 P.M.
  - Monday, March 12, 2007 1:00 P.M.-3:00 P.M.
  - Thursday, March 22, 2007 2:00 P.M.-4:00 P.M.
  - Wednesday, April 4, 2007 2:00 P.M.-4:00 P.M.
  - Thursday, April 26, 2007 3:00 P.M.-5:00 P.M.

PubMed instruction can be arranged to meet your schedule. Contact Mary McFarland: 801-581-5534, marym@lib.med.utah.edu.

**RefWorks**
By request for groups of four or more; contact Jeanne Le Ber at 801-585-6744 or jeannele@lib.med.utah.edu

**Photoshop: Basic Techniques**
- HSEB 3100D
  - Tuesday, February 8, 2007 2:00 P.M.-4:00 P.M.

**Photoshop: Animation Part 1 and 2**
By request for groups of four or more; contact Jeanne Le Ber at 801-585-6744 or jeannele@lib.med.utah.edu

Classes are hosted by the Spencer S. Eccles Health Sciences Library. Online registration is required for all classes. For more information see the Eccles Library Web page at http://registration.med.utah.edu/ or please call 801-585-6744 or 801-581-7535.

Faculty are encouraged to consider integrating library classes into their course content. For more information contact Jeanne Le Ber; jeannele@lib.med.utah.edu; 801-585-6744.

NCBI Classes
Nicola Gaedeke, Ph.D., will be teaching a series of six classes related to the use of the NCBI databases. Classes are scheduled from 1:30-3:00 P.M. and will be taught from Berlin, Germany using web-based Breeze Meeting. Check the classes website to read class descriptions, to verify days and times, and to register. Classes include:

1. **Gene-centered information** (e.g. Entrez-Gene, GeneCards and other resources)—Monday, January 22, 2007
2. **Organism-centered information software** (e.g. Taxonomy Browser and other resources)—Monday, January 29, 2007
3. **From Sequences–Searching to a Multiple Alignment**—Monday, February 5, 2007
4. **BLAST - the Algorithm**—Monday, February 12, 2007
5. **BLink - the BLAST link**—Monday, February 26, 2007
6. **MapViewer** - A genome browser to search and view chromosomes—Monday, March 5, 2007

**NOTE:** Class dates are subject to change; please check online at: http://registration.med.utah.edu/classes.cfm?textonly=false#NCBI
Ejournals AtoZ: Gateway to Full-text

Mary McFarland, Reference Associate
Spencer S. Eccles Health Sciences Library

The Spencer S. Eccles Health Sciences Library has a new ejournals page located at http://atoz.ebsco.com/home.asp?id=ECCL6637. Ejournals AtoZ for Health Sciences is one gateway for the University of Utah community to access online full-text health sciences journals.

The other gateway to online full-text is the Library Catalog at http://155.100.78.49/ipac20/ipac.jsp?&profile=ec#focus. Access to most full-text journals is restricted by a subscription, so current University of Utah affiliates must connect to the University network when off campus. See Remote Access instructions at http://library.med.utah.edu/ed/remoteaccess.php.

Ejournals AtoZ is more than an alphabetical listing. In addition to browsing alphabetically by title, a specific journal title can be typed into the Find box. The database locates all titles containing the typed words and displays them alphabetically. Full-text hyperlinks are displayed below the journal title. If more than 100 titles are found, use the Page list drop down menu to jump to the alphabet section containing the title being searched. To find journals with all variable endings of a word, use the asterisk as the truncation symbol. For example, to find titles with all variations of nurse or nursing, type nurs* in the Find box.

The Advanced search, located to the left of the Find box, offers greater control in searching within a title, publisher name, or ISSN, as well as defining whether the search contains, begins with, or is an exact match to typed words.

Additional search options include:
1. Index tab: click View Titles hyperlink to see full-text titles from a specific publisher or vendor
2. Title tab is the default alphabetical display by title
3. Subjects tab lists journals by subject
4. Search tab opens the Advanced Search screen
5. About this Site describes the Ejournals AtoZ database by displaying an annotated screen image.
6. Library Catalogs tab displays links to library catalogs in Utah and beyond. Most library catalogs include online full-text and physical print information.

Ejournals AtoZ for Health Sciences is a dynamic database. Initially populated from publisher databases, titles are added or edited weekly. If a title is not listed in Ejournals AtoZ, check the Library Catalog. Questions? Contact library staff via email at reference@lib.med.utah.edu or phone at 801-581-5534.

Health News from the Popular Media

Liz Workman, Associate Librarian
Spencer S. Eccles Health Sciences Library

House Calls for Hotel Guests
Several companies now partner with hotels to provide in-room medical care. Travelers such as Mary Ellin Lerner, a vacationer who had injured her foot in Orlando, find the convenience of the service especially appealing. She preferred on-site medical care over the daunting task of finding a healthcare facility in a strange city, and quipped, “Who wants to spend their vacation in an emergency room?” A hotel room visit from a provider will generally cost anywhere from $200 to $350.

USA Today January 27, 2006.

Recognizing Depression in Older Men
Jed Diamond, a 61 year-old psychotherapist in California, developed a depression test just for men. He believes that scientific studies suggest that the changes men experience as they grow older are different from those of women. These changes may go undetected in older men, who are less conditioned to get an annual medical exam than older women, according to the article’s author. Fifteen percent of suicides in 2001 were carried out by men over the age of 65. Group therapy and other measures can be helpful for men suffering depression.

“Ladies Night” at Fitness Center Very Popular
Wmat NdEe Bii Fitness Center in Whiteriver, Arizona recently offered an evening of fitness activities exclusively for women that drew over 100 participants in the small community. Many of the attendees found the event appealing because they feel uncomfortable working out around men. The event featured fun activities such as hip-hop aerobics, as well as traditional services such as instruction in weight lifting.

Fort Apache Scout, April 28, 2006.

Concern Over Used Medical Devices Sold Online
Officials have voiced concern over the sale of refurbished medical devices that are sold online. In one case, a pace maker which was sold on Ebay and implanted in an Arizona patient turned out to be stolen. An FDA official stated that their agency periodically monitors Websites, but has not established specific rules addressing the online sale of refurbished goods on Ebay.

NOTE: Popular media news items are available from ProQuest, a news database available from the Spencer S. Eccles Health Sciences Library. ProQuest provides access to ABI/Inform, one of the premier business and management periodical indexes. ProQuest also includes coverage of over 150 major U.S. and international newspapers such as The New York Times and the Times of London, plus hundreds of other news sources and news wires including Ethnic NewsWatch, GenderWatch and The New York Times historical backfile. Access ProQuest from the Article Databases and more link on the library’s home page (http://library.med.utah.edu).
**Student Recommended PDA Resources**

During the Topics In Medicine Pediatrics rotation, third year medical students are asked to evaluate PDA (personal digital assistant) software and present a brief overview of the application. The following PDA programs were selected and reviewed by students this past academic year.

**Geriatrics At Your Finger Tips**
URL: http://www.geriatricsatyourfingertips.org/front-back/pda.asp
Currency: 2005 version; updated annually
Platform: Palm OS and Pocket PC
Fee or Free: Free
Description: First published in print in 1998, this resource provides practical information on the evaluation and management of diseases and disorders common to older adults. The online and handheld editions have the goal "to reduce to a minimum the amount of time that a practicing clinician must spend searching for specific information that is needed immediately to make patient care decisions."
Student comment: "Easy to navigate, nice features, comprehensive listings, assessment instruments, calculating equation."

**Handbook of Diagnostic Tests**
URL: http://www.lww.com/product/?978-1-58255-326-9
Currency: 3rd edition, 2003
Platform: Palm OS, Pocket PC and Windows CE
Fee or Free: $47.95
Description: "Provides quick access to thousands of medical eponyms with descriptions. Contains a list of 1,600 common and obscure medical eponyms with descriptions."
Student comment: "I wish that there was better navigation."

**John Hopkins ABX Guide**
URL: http://www.hopkins-abxguide.org/
Currency: Reviewed and updated monthly
Platform: Palm OS
Fee or Free: Free
Description: "The Antibiotic Guide is a "decision support tool" intended to provide clinicians with concise, digested, timely information about the diagnosis and treatment of infectious diseases. The information is arranged so that it is clinically useful at the point of care, instantly." PDA edition: 2003
Student comment: "Advantages: easy to navigate and very quick reference… I wish the program had information on breastfeeding beyond the two weeks."

**Medical Eponyms**
Currency: Updated July 30, 2006
Platform: Palm OS and Pocket PC
Fee or Free: Freeware
Description: Contains a list of 1,600 common and obscure medical eponyms with descriptions.
Student comment: "Description only. Does not explain diagnosis tests, lab values, treatment options."

**Medical Spanish Pocket Plus**
Currency: Free trial
Platform: Pocket PC
Fee or Free: $24.95 (free trial)
Description: Provides an overview of the Spanish language and includes basic anatomy and medical terminology. One section covers specific questions and phrases that occur during a patient history/examination for each medical specialty. There are additional dictionaries available with more extensive terminology.
Student comment: "It helps with speaking [Spanish], but translating the other way (Spanish to English) is more difficult in a practical setting."

**Mobile MerckMedicus**
URL: http://www.merckmedicus.com/pp/us/hcp/hcp_mobile_medicus.jsp
Currency: Depending on the resource, daily, weekly, or with updated edition
Platform: Palm OS and Pocket PC
Fee or Free: Free
Description: Developed by Merck, Mobile MerckMedicus is a medical reference that includes the classic Merck Manual (17th edition, with full-text) and 3 other resources: Pocket Guide to Diagnostic Tests, Reuters Medical News and MEDLINE Journals.
Student comment: Navigation "good," install process "easy," "no full journal access."

**Stedman's Dictionary**
Currency: 28th edition
Platform: Palm OS, Pocket PC, Windows Smartphone
Fee or Free: $49.95 (Skyscape)
Description: "Provides quick access to thousands of medical terms, drug names, eponyms, procedures and protocols."
Student comment: "Advantages: easy to navigate and very complete. Disadvantages: very limited descriptions and no treatment suggestions."
Slice of Life 2007 Is Coming to Salt Lake City

Slice of Life is an annual conference for multimedia developers, users, and evaluators. The 2007 conference will be hosted in Salt Lake City from June 26-30. Sponsored in part by the Spencer S. Eccles Health Sciences Library, SoL is celebrating its 19th year in 2007. The pre-conference workshops, panels, breakout sessions, demonstrations and presentations will be held in the Spencer F. and Cleone P. Eccles Health Sciences Education Building, adjacent to the library.

Pre-conference workshops will feature capabilities and uses of the new HSEB clinical skills suite, the effective use of media in anatomy education, and techniques of video compression for the Web by experts in the Eccles Broadcast Center. Additional sessions include Internet2 capabilities, Moodle Learning Management System, teaching communication skills with computers and team learning with technology.

Hotel Rooms have been reserved in the University Park Marriott, the University Guest House and the Olympic Village Dormitories. Exciting social activities include a visit to The City Library, Red Butte Gardens and the Fort Douglas Post Theater.

You are encouraged to join the monitored announcement list at: http://www.jiscmail.ac.uk/lists/SLICE_OF_LIFE.html A call for abstracts will be issued soon and due January 15, 2007.

New Online Journal Collections

Sage Publications Collection

The University of Utah now has online access from 1999 to the present for 440 peer reviewed journals from the interdisciplinary publisher Sage Publications. This collection represents a gain of 330 online titles for the university, and includes forty-eight new titles indexed in PubMed MEDLINE, and thirty-six indexed in CINAHL (Cumulative Index to Nursing and Allied Health). The collection is strong in nursing, psychology, and psycho-social aspects of medicine. The list of journals can be browsed at http://www.sagepub.com/journalsIndex.nav

The LWW Legacy Archive

The LWW (Lippincott Williams & Wilkins) Legacy Archive provides online access to the full-text of 220 medical, nursing and healthcare titles from volume one, issue one, through 1999. This includes very large runs of many titles, including 80 years of Academic Medicine, 106 years of American Journal of Nursing, 132 years of Journal of Nervous and Mental Disease, and 60 years of Plastic and Reconstructive Surgery. The archival journals are available along with our current subscriptions on the Journals@Ovid platform. The LWW Legacy Archive titles will be linked in the online catalog and on the ejournals and database pages. From the Ovid gateway, http://gateway.ovid.com/autologin.html, click on YOUR JOURNALS@OVID.

Special EndNote Training Available

Donna Kirking, Product Training Coordinator for Thomson Research Soft, has scheduled a visit to Salt Lake City for Wednesday, February 28 to Friday, March 2, 2007. As a company trainer, Donna knows the EndNote software inside and out. This will be an excellent opportunity for EndNote users to receive introductory and advanced training from the expert. If you have been using EndNote for a while but still need clarification about certain functions, this training is for you. To register see the Classes @ the Library Web page. (http://registration.med.utah.edu/classes.cfm?textonly=false#EndNote)

Questions? Contact Jeanne Le Ber; 801-585-6744; jeannele@lib.med.utah.edu

Basic Introduction to EndNote

Date: Wednesday, February 28, 2007 Where: HSEB 3100D
Time: 8:00-9:30 a.m. (Pt. 1) and 9:45-11:15 a.m. (Pt. 2)
Repeats: 12:30-2:00 p.m. (Pt. 1) and 2:15-3:45 p.m. (Pt. 2)

Filters and Connection Files

Date: Thursday, March 1, 2007 Where: HSEB 3100D
Time: 8:00-10:00 a.m.

Output Styles (Creating and Editing)

Date: Thursday, March 1, 2007 Where: HSEB 3100D
Time: 10:15 a.m.-12:15 p.m.

EndNote Questions and Answers Open House

Date: Thursday, March 1, 2007 Where: HSEB 3100A
Time: 1:30-3:30 p.m.

EndNote Web

Date: Friday, March 2, 2007 Where: HSEB 3100D
Time: 8:00-10:00 a.m.

IAIMS Newsletter Deadline and Mailing List

Editor: Jeanne Le Ber (jeannele@lib.med.utah.edu)
Assistant Editor: Allyson Mower (amower@lib.med.utah.edu)

The deadline for the Summer 2007 issue of the IAIMS Newsletter is Monday, April 30, 2007.

The IAIMS Newsletter is available electronically at http://library.med.utah.edu/or/iaims/iaims.php

To receive a copy of the electronic version in PDF format, go to http://lib.med.utah.edu/mailman/listinfo/iaims, enter your email address and name (optional), and click on the Subscribe button. You will receive an email stating the newsletter has been published with a link to the pdf copy.

To be added to the printed newsletter mailing list, send your name and address to: Jeanne Le Ber, Editor, IAIMS Newsletter, University of Utah, Eccles Health Sciences Library, 10 N 1900 E, Salt Lake City UT 84112-5890

VOICE: 801-585-6744; FAX: 801-581-3632
EMAIL: jeannele@lib.med.utah.edu
