Access Grid Technology and Creative Pursuits; InterPlay: Distributed Real-time Surrealistic Cinema

When: Wednesday, October 18, 2006
Time: 12:05 P.M. to 1:00 P.M.
Where: Health Sciences Education Building, Room 2600
Who: Jimmy Miklavcic, Multimedia Specialist
What: Library and Information Technology Forum

Program Description
The Access Grid is a powerful collaborative tool for those, separated by long distances, to work together. This certainly is true for those in the computation and medical sciences. How do we take this technology and push it into the creative arts arena? How can we adapt this "meeting" technology into a "performance" technology? Jimmy will talk about the InterPlay process as it is pushing the technology further.

Presenter
Jimmy Miklavcic is the Multimedia Specialist for the University of Utah's Center for High Performance Computing and the Executive Director of Another Language Performing Arts Company. Together with Beth Miklavcic, Artistic Director of Another Language, they created the InterPlay form of telematic collaborative performance in 2003.

Light refreshments will be served!
Sponsored by the Spencer S. Eccles Health Sciences Library
