Clickers, Polling Devices, Audience Response Systems in Health Education

**WHEN:** Wednesday, May 2, 2007

**TIME:** 12:05 P.M. to 1:00 P.M.

**WHERE:** Health Sciences Education Building, Room 2680

**WHO:** Suzanne S. Stensaas, Director of Block IV Neuroscience Curriculum

**WHAT:** Library and Information Technology Forum

---

**Program Description**

The Spencer S. Eccles Health Sciences Library acquired 120 "clickers" (response devices) in September of 2006 for use in undergraduate medical education. They were first used during lectures to 100 medical students, but have since been used for resident training, evaluations, opinion assessment, and staff training. The selected technology is from Turning Technologies. A demonstration of ways the clickers can be used will be presented including audience participation by each attendee (anonymous). The Eccles Library staff is planning to assist and train faculty on their use in various educational settings. This informal demonstration of the system is for you to explore and question the appropriateness of enhancing your presentations with such an application.

---

**Presenter**

Suzanne S. Stensaas, Ph.D., is a Clinical Professor of Neurobiology and Anatomy and the Eccles Health Sciences Library Health Sciences liaison with the School of Medicine. Suzanne is interested in new technologies in education and how distant education can be made more effective.

---

**Light refreshments will be served!**

Sponsored by the Spencer S. Eccles Health Sciences Library
