

**HEAL COLLABORATIVE:
NEW SERVICES, NEW MODELS OF PARTICIPATION**

Moderators:

Sharon Dennis, HEAL Program, University of Utah Spencer S. Eccles Health Sciences Library, Salt Lake City, Utah

Sandra McIntyre, HEAL Program, David Geffen School of Medicine at UCLA, Los Angeles, California

Description:

HEAL has been the pioneering and largest initiative for sharing educational health sciences materials. With 20,000 freely accessible resources and over 8,000 registered users, HEAL is embarking on a new stage of development. Starting in 2006, a collaborative of health sciences schools and libraries will jointly govern and sustain HEAL with institution-based, satellite repositories created with the new “HEAL Local” application. In this break out session, you will learn about the benefits of the HEAL Collaborative.
