

**Predicting Future Trends in Medicine and Education.  
What we can learn from the Japanese and Robotics?**

**Francis Rabuck CCP,PCLP,CWNA,RFID+  
President, Rabuck Associates**

Continuing on the theme of the opening keynote, we will look at ways to peer into the future. How do you predict the future in new areas of medicine, education and society? What can we learn from the Japanese and their plans for robotics in healthcare for the elderly? What kind of remote medicine can be provided "at Home" with testing and monitoring of patients. How will all of this change the way we teach and learn in the future? This breakout will uncover possibilities you had not thought of and ways for you to be a better prognosticator. Come share your visions and ideas for the future.
